

OYSTER 475

THE IDEAL FAMILY BOAT, OFFERING SPACIOUS AND LUXURIOUS ACCOMMODATION

OYSTER 475: AN OVERVIEW

The Oyster 475 is more evolution than revolution. After all, why completely change something that is already so successful? The 475 has simply improved upon the already well-proven Oyster 46 with a lengthened hull giving a larger aft deck, plus a host of other subtle enhancements both in styling and fit-out. With more than 35 Oyster 46 and 475s sold, we like to think that their owners agree with us.

The Oyster 475 is the ideal family boat, using updated build techniques, the latest and most advanced design engineering, we have produced a hull and deck construction which is light, strong and stiff; so out on the water the 475 is a very balanced yacht to sail - almost certainly 'best in class' for righting movement and form stability.

Her cockpit design calls on lessons learnt from professional ergonomic studies, and her generous deck space includes a large aft area with easy access down to the bathing platform. For the world cruiser, stowage space is a major consideration and the Oyster 475 has an outstanding lazarette, swallowing all that cruising kit.
